

4-7 Indirect Measure

Using the properties of similar polygons and proportions and applying these properties to solve problems.

$$\frac{1.5}{0.8} = \frac{f}{33.6}$$

$$\textcircled{\frac{63}{m}} = f$$

$$\frac{350}{400} = \frac{d}{180}$$

$$\textcircled{\frac{157.5}{m}} = d$$

$$\frac{x}{56} = \frac{1.5}{0.6}$$

$x = 140$
m

$$\frac{150}{125} = \frac{144}{d} \quad \frac{18000}{125}$$

$$d = 120 \text{ ft}$$

$$\frac{10}{7} = \frac{B}{18.5}$$

$$B \approx 26.43$$

$$26 \text{ ft. } 5 \text{ in}$$

$$\frac{43}{100} = \frac{n}{12} \text{ in}$$

14.)

$$\frac{a}{236 \frac{1}{4}} = \frac{5 \frac{1}{3}}{2 \text{ ft.}}$$

$$a = 630 \text{ ft.}$$

$$16.) \quad \triangle ABC \sim \triangle CDE$$

$$17.) \quad \frac{\overline{AB}}{\overline{BC}} = \frac{\overline{ED}}{\overline{DC}}$$
